## STABILIZER™ 2.0 KITS

The **Stabilizer 2.0** family of end mills raises the bar in high performance milling by incorporating a patented continuously varying asymmetrical geometry which helps create a smooth chatter free milling condition. The **STR430.2** series of end mills are specifically designed for machining steels, alloy steels, copper alloys and cast iron while the **STR440.2 HT** series are specifically designed for machining ISO-S materials such as stainless steel, steels over 42 Rc, titanium and Inconel. These configurations, along with a specially engineered flute shape, allows for double the feed rates!

## GENERAL PURPOSE C430 SERIES KITS

The Niagara Cutter™ **General Purpose C430 Series** end mills come equipped with four precision ground flutes that are capable of handling a variety of metal removal applications. Coupled with a TiAlN coating, these general purpose end mills outperform many traditional cutting tools. The C series is offered in a range that is best fit for any job shop environment. This single tool can replace the use of multiple tools for increased productivity, tool life and cost reduction. The C series of Niagara end mills also comes in a two and three flute option.

- Solid Carbide
- 30° Helix
- Square End
- Center Cutting

## ELITE A345 SERIES KITS

Niagara Cutters **Elite Series A345** of end mills feature specific geometries for nonferrous materials, available in 0.125" - 1.25" diameters. The A series is designed for Aluminum and non ferrous materials and is available with two or three flutes in a variety of configurations.

- Cylindrical land to eliminate chatter
- Form ground flute shape
- Eccentric primary relief
- Ideal for peripheral milling
- Slotting Parameters at 1/2 x D
- Solid Carbide
- 45° Helix
- Square End
- Center Cutting
