# YOUR SOLID TOOLING & TECHNOLOGY EXPERTS

## A TEST FOR OURSELVES & A PROMISE TO OUR CUSTOMERS

Niagara Cutter understands product consistency, quality, and maximum levels of performance are paramount to our customers. These fundamentals begin in our dedicated R&D, Engineering, and test facilities. The knowledge gained through these resources serve as a framework to educate not only ourselves, but also allow us to assist our customers in becoming competent and practical experts. Extensive product development and educational initiatives support Niagara Cutter's continuous achievement in exceeding industry expectations. Always striving for excellence and embracing the needs of our customer guarantee that the promise we make is the promise we keep...to provide the highest value cutting tools in the world.

### DOUBLE YOUR METAL REMOVAL

The **Stabilizer 2.0** family of end mills raises the bar in high performance milling by incorporating a patented continuously varying asymmetrical geometry which helps create a smooth chatter free milling condition.

The **STR430.2** series of end mills are specifically designed for machining steels, alloy steels, copper alloys and cast iron. These configurations, along with a specially engineered flute shape, allows for double the feed rates!

## 4-FLUTE

**COATING**  
• AlTiN

### DOUBLE YOUR PRODUCTIVITY

High performance machining (HPM) with the new **Stabilizer 2.0** can be highly effective in many 2D applications including slot milling, pocket milling and side milling. Higher metal removal rates can be achieved by increased feed rates and step overs pushing 50%+ of the cutter diameter compared to conventional machining strategies. Achieving the best possible results requires using these few common practices.

The **STR440.2** series are specifically designed for machining ISO-S materials such as stainless steel, steels over 42 Rc, titanium and Inconel. These configurations, along with a specially engineered flute shape, allows for double the feed rates!

# GENERAL PURPOSE C430 SERIES KITS

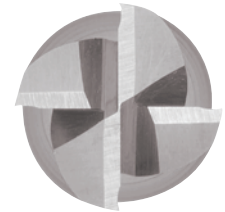

**COATING**  
• TiAlN

## REPLACE THE USE OF MULTIPLE TOOLS

The Niagara Cutter™ **General Purpose C430 Series** solid carbide end mills come equipped with four precision ground flutes that are capable of handling a variety of metal removal applications. Coupled with a TiAlN coating, these general purpose end mills outperform many traditional cutting tools. The C series is offered in a range that is best fit for any job shop environment. This single tool can replace the use of multiple tools for increased productivity, tool life and cost reduction. The C series of Niagara end mills also comes in a two and three flute option.

- 30° Helix
- Square End
- Center Cutting

**ENJOY SUPERIOR CHATTER-FREE SLOT AND SIDE MILLING**

Niagara Cutter's Elite Series A345 of solid carbide end mills feature specific geometries for non-ferrous materials, available in 0.125" - 1.25" diameters. The A series is designed with a unique cylindrical land margin for eliminating chatter and added rigidity exceling in aluminum and non-ferrous materials. Available with 2 or 3-flutes in a variety of configurations.

- Form ground flute shape
- Eccentric primary relief
- Ideal for peripheral and slot milling
- 45° Helix
- Square End
- Center Cutting
